CONNECT
ONE

SOS/HELP CALL

Enables you to contact the public emergency services for medical support.

ROADSIDE ASSISTANCE

Calling for help or assistance. Automatic localization avoids having to give directions to the operator in an emergency.

CUSTOMER CARE

Contact the call center for questions or doubts about the vehicle. Instant answers for any doubts.

OVER THE AIR UPDATES

Update the Software of the in-vehicle systems by Over The Air. Software updates are available for the Infotainment, the Apps and the Telematic Box. When the updates are available a message is displayed on the Infotainment. If the Customer postpone the update a message will be shown on status bar info area.

CONNECT
PLUS

12 months free trial included

REMOTE OPERATIONS

Interact and send commands to the vehicle (e.g. lock or unlock the doors, turn on the headlights) even when owner is not in the nearby.

E-CONTROL

Remotely manage the vehicle charging, monitor the battery level, schedule the recharging and set the climate control.

DIGITAL KEY*

Use the smartphone to unlock your car remotely, to start the car and drive away. No need to remove device from pocket/purse. In a situation where the phone battery is drained, a backup keycard is available.

LIVE WEATHER/ TRAFFIC/SPEEDCAMS

Updates about traffic, weather and speed cameras directly available on the Infotainment system during the navigation.

CHARGING STATION/ FUEL FINDER

Find a public Charging station where you can recharge the batteries of your electric and hybrid vehicle or Find a Fuel station.

POI SEARCH

Find a Position of Interest (POI) like Restaurants, Museums, Hospitals, Stadiums, Shopping centers, etc directly on the mobile app.

MAPS UPDATE OVER THE AIR

Update your NAV maps automatically, through embedded connectivity. The customer has the vehicle's maps always updated!

ON STREET PARKING

Helps customers to find a parking place «on the street». When searching an address or POI, it indicates a level of probability of success in finding a free parking slot on the Infotainment system.

SEND & GO

Find a location on the mobile app and send the destination directly on the navigation system.

GEOFENCING (PASSIVE MODE)

The passive mode is for all the engine type: when there is a Low emission zone a new map content become visible on the infotainment system to identify and alert the customer about it. Feature available only on board.

NATURAL VOICE RECOGNITION

Lets you control various functions inside your car without leaving your hands off the steering wheel and your eyes from road. Functions that can be done are: for instance the choice of own profile, air-conditioning settings, radio, telephone, etc.
